Soil Analyzer

An automated robotic analyzer for rapid, simple and accurate pH analysis and EC measurement of soil samples in a variety of vessels.

Flexible to meet all of the requirements of ISO 10390 and 11265, EPA 9045D, Agriculture and Agri-Food Canada 84-001, pH and 84-003 salt methods, as well as many other custom methodologies.

FEATURES

- Supplied with dual cassettes for analysis of 2 samples simultaneously.
- Each cassette contains a pH electrode, a spring-loaded speed adjustable stirring mechanism, and 2 dispensing tips.
- Optional Dual Electrode Accessory includes two additional cassettes, to analyze a total of 4 samples simultaneously.
- Up to 5 point pH calibration and 2 point EC calibration.
- Dual pumps accurately dispense from 1-100 ml of up to two different reagents per sample. Better than 0.5% accuracy in delivery at 1 ml.
- Wash station is designed to properly clean electrodes and probes, to avoid cross contamination.
- Flexible Sample Racks
 - 72 positions with 100 ml tubes, and an additional 8 positions for pH buffer and QC sample positions.
 - 72 positions with 3 oz disposable cups, plastic or cardboard (Dixie cups), and an additional 8 positions for pH buffer and QC sample positions.
